

clean

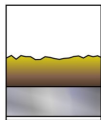

The coffee bean contains 10-16% ethereal oils (coffee residue) depending upon origin and roasting.

1st day

The coffee residue already on the first day leaves a fine film in the brewer and becomes rancid.

2nd day

Without cleaning, the build-up of coffee residues will be 3-4 times higher than on the first day. The taste of coffee is spoiled!

Only **KAMARETA®** completely removes coffee residues from coffee machines.

Afterwards you will enjoy the real flavour of your coffee again.
